## Summary

I am a Frontend developer who also have reasonable experience of backend. MERN Stack precisely. Coming from the field of User experience design before moving into Web development, I aim at developing and creating human centered design solutions with empathy. JavaScript, React, Bootstrap, CSS/HTML, jQuery, Sass, Node, Nest\*, Express, Node Package Manager, API CRUD operation, Database, MongoDB and Mongoose, Deployment, Git and GitHub, Adobe XD, Figma etc. I also have good knowledge of Python and currently enthusiastic to learn Django. I am a critical thinker, a life-long learner and surprisingly fast at picking up new concepts. I am also fluent in German and English language

## Experience

### *Front End Developer*

#### **Stutern**

June 2020 – Sep 2020 (4 months)

Stutern is a Software Engineering Bootcamp that helps student start a career in the software industry. I worked on rebuilding a new website for the company. I specifically worked as a Front-End Developer

### *Information Technology Intern*

#### **Cico Serve**

June 2019 – August 2019

A financial Startup that was beginning at the time. Did my internship there after doing a UI/UX Bootcamp. I helped design some of their products with Figma.
